

**IMPORTANT INFORMATION ABOUT  
YOUR WATER USE APPLICATION # \_\_\_\_\_**

The Yukon Water Board cannot issue a water use licence until a Decision Document has been issued under the *Yukon Environmental and Socio-economic Assessment Act* (“YESAA”), and any licence that is issued cannot be contrary to that Decision Document. Your application for a water use licence will not be adequate for public review until a YESAA Decision Document has been issued, and until you have provided written confirmation that your project has not changed through the YESAA assessment process.

As soon as you have received your YESAA decision document, please complete this form and return it to the water board office. You may send it by fax (867) 456-3890.

For more information about the YESAA process, please contact your YESAA district office. Contact information is available at their website <http://www.yesab.ca>.

**DO NOT COMPLETE THIS FORM UNTIL AFTER YESAA HAS BEEN COMPLETED.**

If your project has changed, then you must provide the water board with either a new, or an amended, application. In that case, please contact the water board office as soon as possible.

---

**PROJECT CONFIRMATION**

I hereby certify that a YESAA decision document has been issued and the above noted water use application is accurate and complete and that the project has not changed during the YESAA assessment process.
