MS08-273

Good Afternoon Clint,

I reviewed the information that you provided by email on December 15, 2008. I would like to confirm that the outstanding information that is still requires includes the written agreement from City of Whitehorse for the NRI to continue occupying the property.

Also, in regards to the YESAA assessment, I also contacted Rob Walker, GY Development Assessment Branch to request a status update as to whether or not you require an additional YESAA assessment that covers the water use and deposit of waste for the hatchery. I will send you confirmation when I receive a response from Mr. Walker.

If you have any questions, please call me.

All the best,

Kelly Boutilier
