Subject: Northern Research Institute Water Use Application MS08-273

Good Afternoon Mr. Sawicki,

The above referenced water use application was submitted to the Yukon Water Board on July 24, 2008. I have advised you previously that an agreement is required by way of my letter to you dated September 10 and October 31 of 2008 and by emails dated January 7 and May 19 of 2009 that the only document outstanding is a letter of agreement of occupancy from the City of Whitehorse that permits the fish hatchery to continue operating for the 25 year term of licence that you have proposed.

Can you please advise, by reply email, what efforts have been made to obtain this letter of agreement and provide confirmation of when the letter will be available to submit as part of your application? If you cannot obtain a letter of agreement from the City, we will have to discuss the withdrawal of your application.

If this should happen then I would recommend that you discuss decommissioning of the facility with Government of Yukon-Water Resources. I have copied this email to Matthew Jenner who is a Water Inspections Officer and he may be able to give you regulatory guidance should decommissioning be necessary.

Thank you for your attention to this matter.

Kelly Boutilier
Licensing Officer
Yukon Water Board
