Subject: MS09-0287 Environment's Intervention

Hi Pat,

Thank you for your letter to the Yukon Water Board regarding Atlin Road upgrades and Haunka Creek Bridge.

Highways and Public Works is aware of the unnamed creek at km 12 Atlin Road. We have spoken with the land owners that use the creek for a water source several times and have made arrangements to keep them informed of our activities.

Regarding your proposed mitigations, HPW has already made arrangements with the residents using the creek. We will provide them with advance notice and have arranged with them for the removal and replacement of the observed black waterline.

HPW will implement the mitigations you propose and employ best practices for working around water as recommended in your intervention.

Thank you for your assistance in these matters.

Yours truly,

Rob Walker
Manager, Environmental Affairs
Highways and Public Works
Yukon Government
