VAN EVERY INC. - Maisy May Creek - PM09-637

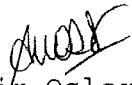

Dear Jason,

Thank you for your letter of November 4, 2009. The enclosed response will use a similar sequence as your correspondence for a matter of clarity and ease.

1. An updated page #26 of the Water License Application is included with a copy of this letter. On that page, the grant number where an existing ford is located has been corrected. Please exchange this page for the one that is in the original application submission.
2. The clarification of ice and only ice being removed from the Maisy May Creek channel by the backhoe, has been included on page #83. Please substitute this new page for the one that is in the original application submission.

I hope that this information answers your questions. If additional information is needed, please do not hesitate to contact me by e-mail at your earliest convenience.

Thankyou for your consideration in this matter and best regards,

Tim Osler
