Mr. Osler

**Re: Water Use Licence and Mining Land Use Approval Application PM09-637,  
Maisy May Creek, a tributary of the Stewart River**

I have completed a review of the above mentioned application received on May 29, 2009. In order to continue the review of your application I require you to provide the following information and/or clarification.

Section H of the Water Use information sheets has stated that the existing ford is located on claim P35137. I believe this to be a typo and should read P36137. Please verify that P36137 is the correct claim number and update Section H, which has been attached for your convenience.

Question 2 of the Mining Land Use Approval sheets has reference to a camp opening plan. In this plan you state that there may be the establishment of a channel in the creek bed. As further clarification of this undertaking please elaborate if this channel will be solely created in ice for the de-icing process or if it entails any modification to the creek bed.

Please be advised that the current Water Use Licence will expire on July 1, 2009. As a new Water Use Licence will not be issued prior to this, the application will not be viewed as a renewal and will be processed as a stand alone application.

Yukon Environmental and Socio-economic Assessment Act

The Yukon Water Board has determined that all water use applications must include a completed YWB Project Confirmation Form and the YESAA Decision Document. Once the YESAA Decision Document has been completed, please review your application and determine if your project has been changed as a result of the YESAA process from what you have described in your water use application.

YWB

PM09-637

It is your responsibility to inform the Water Board by completing the YWB Project Confirmation Form and provide details of any changes to your application. A Project Confirmation Form has been enclosed with this letter.
