Mr. Osler

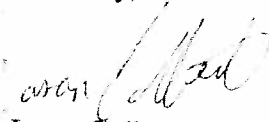

**Re: Water Use Licence and Mining Land Use Approval Application PM09-637,
Maisy May Creek, a tributary of the Stewart River**

Thank-you for submitting the YWB Project Confirmation Form on November 4, 2009; however, before I can continue to process this application I need the information requested in the letter of June 8, 2009. The information is as follows:

Section H of the Water Use information sheets has stated that the existing ford is located on claim P35137. I believe this to be a typo and should read P36137. Please verify that P36137 is the correct claim number and update Section H, which has been attached for your convenience.

Question 2 of the Mining Land Use Approval sheets has reference to a camp opening plan. In this plan you state that there may be the establishment of a channel in the creek bed. As further clarification of this undertaking, please elaborate if this channel will be solely created in ice for the de-icing process, or if it entails any modification to the creek bed.

Sincerely,

Jason Colbert
Licensing Officer
