Hello Jason:

RE: Amendment to Newcan Placers Ltd. PM03-321 Water/Placer Land Use

Please find attached signed pages for an amendment to Newcan Placers Ltd. PM03-321 water license/ class IV placer mining land use permit.

Mr. Cowan would like to add placer lease ID00751 to this license. This would allow the construction of a road on the right limit of Emaline Pup on this lease and on existing placer claims EMA 9 (P19377) through EMA 20 (P19388), and the construction of a new trailer camp on ROG 20 (P10519). Please see attached map.

Due to poor advice I have already completed both class 2 and 3 placer mining land use applications for these works. Yesterday I delivered a copy of the Class III placer mining land use application for the same works to Jason at the Water Board office. The same works and work on other sections of the Henderson Creek road (Yukon Lands permit) have already been assessed under YESAB and I delivered a copy of the Decision Document yesterday as well.

I have included the following additional pages of a class 4 mining land use application: signed Schedule IV; Page 7 claim list addendum, Agent Authorization; Environmental Health Form; and the placer claim map with roads and camp marked on.

I trust you will expedite this process given the number of false starts. I am out of the country but you may reach me via email at [rclarkson@northwestel.net](mailto:rclarkson@northwestel.net).

I have asked Hayden Cowan to sign and fax the following letter of permission and authorize the \$30 application fee from his credit card.
