TO: Register QZ01-051, Exhibit 12.2

RE: Additional information included in the register by the Board

Territorial Resources Base Map 105G/8, which is not currently referenced in any of the Final Agreements that have been signed to date, has been reviewed by the Board, to assist in their understanding of the location of the undertaking and settlement land. It was not distributed to the parties, because it does not constitute new information, just clarification of information already available to the parties.
