Ms. Judi White, Manager
Yukon Water Board
Suite 106, 419 Range Road
Whitehorse, Yukon Y1A 3V1

Dear Judi:

**Re: Amendment to Environment Canada Intervention (Corrected Version) for
QZ04-065 – Yukon Zinc Corporation, Wolverine Mine Project**

Environment Canada is requesting to amend our intervention, listed as exhibit 5.6 on the public register for Application QZ04-065. The amendments we seek are as follows:

- Change Maximum Allowable Concentration (MAC) for Sulphate, in Table titled “Effluent Quality Standards...” beginning on page 6, from 1000 mg/L to 1800 mg/L (example corrected page attached as exhibit 6.8.1.1);
- Remove final sentence from RATIONALE section of RECOMMENDATION 9, which is the last sentence contained on page 12 and begins as “Shallow water covers maintain...” (example corrected page attached as exhibit 6.8.1.1);
- Amend surface monitoring network table (“...Surface Monitoring Network Component (Partial)...”) in Appendix 1 by:
 - changing frequency for site P1 (Wolverine Lake) from “M” to “A”;
 - changing frequency for site L-1 (Little Wolverine Lake) from “M/W” to “M”;
 - adding site called “W-1 (Wolverine Lake Outlet)” and with a frequency of a quarterly (“Q”) basis for the analytical suite similar to that of site P-1 (example corrected page attached as exhibit 6.8.1.1); and
- Amend groundwater monitoring network table (“...Groundwater Monitoring Network Component (Partial)...”) in Appendix 1 by:
 - changing frequency for three stations or station areas listed under “Potential Future Monitoring Well Installations” from “Monthly” to “Quarterly” during operations phase of mine life (example corrected page attached as exhibit 6.8.1.1).
